DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: 1, 10, 17 and 20.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

During a telephone conversation with Floyd Carothers on June 17, 2006 a provisional election was made without traverse to prosecute the invention of figure 17, claims 1-5, 8-13, 17 and 18. Affirmation of this election must be made by applicant in replying to this Office action. Claims 6, 7 and 14-16 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected

invention. (Applicant stated that claim 6 is withdrawn but did not state that claim 7 is withdrawn. Examiner withdraws claim 7, which depends from claim 6.)

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5, 8, 10 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 7,008,427 to Sevrain. Sevrain discloses in figure 2A elongate plates, a lock assembly 37, which prevents further plate separation but allows for shortening, means for permitting the distance to be shortened comprising protrusions 36 and the slots through which they are received, and compression spring means 39.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sevrain in view of U.S. Patent No. 5,735,853 to Olerud. Sevrain is silent regarding screw locking elements. Olerud discloses in figure 3 a screw locking mechanism 45 and 19. The locking device comprises "head seats" including the proximal surface of ring 19 and element 25. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the screw locking mechanism taught by Olerud in the Sevrain plate to retain the bone screws at varying angles.

Allowable Subject Matter

Claims 9 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
